

### MagMax Story

A highly civilized group of aliens has conquered the earth and put the human beings under the contol of the Computer Babylon which has begun to kill the human beings. In order to stop the aliens, the people developed a transformable mechanical robot named MagMax. They also chose a brave man for their rescue. The brave man is about to depart to the ultimate battle with the aliens in order to save the human race.

MagMax is an action game fought with a transforming robot. The player can transform himself into a robot, increasing his power as he builds the robot to fight against more than 30 different enemies. Now get ready for the ultimate battle against the gigantic mechanical monster Babylon.

# Name of Controller Parts and Operating Instructions

Use Controller 1 for 1 player games Use Controller 2 for second player in 2 player games

```
CONTROL Pad
```

```
2 SELECT Button
```

```
3 START Button
```

```
4 B Button
```

```
5 A Button
```

CONTROL Pad: Move MagMax in eight different directions. SELECT Button: Use this button on title screen to select 1 player or 2 player game. START Button: Push this button to start the game. If you push it during the game, the game stops. If you push the button once more, the game starts again.

B and A Button: These buttons control the beam gun.

### How to Play

You control MagMax, the player. MagMax begins as a body part, but as you assemble all four parts, the robot gains power and begins to attack his enemies with his beam gun. Guide MagMax through four locations: forest, desert, sea and automated city. With the Warp Hall, you can also move between the surface and underground. After you complete the battle in the desert and the automated city, you will have to confront Babylon, the gigantic mechanical robot.

- Control MagMax with Button 42. Button A or B.
- Move up and down between the surface and underground through the <</li> Warp Hall.

Each additional body part increases the number of bullets he can shoot.

When MagMax is touched by the enemy, enemy's bullet, and/or obstacles, one turn is over. However, when the player has already attached MagMax's parts and touches one of these objects, the parts will separate and explode, but MagMax will survive. When all MagMaxes explode, the game is over.

Attack the chasing enemies and other objects with energy beam by pushing

#### Characters

33. Rock Icicle If the player shoots it down toward the enemy and hits it successfully, he will gain points.	
34. Multi headed Cannonball When the player destroys it, it releases black shells.	

## **Techniques for Ultimate Victory**

- When both MagMax's head and wave beam gun are attached, you can successfully destroy the enemy.
- you destroy the enemy with these black bullets, you will get bonus points.
- If you shoot rock icicles down with an energy beam and destroy the enemy with the falling rock icicles, you will also get bonus points.
- Watch out for the underground volcano.

When you destroy the multi-headed gun with a beam, it will shoot black bullets. If
